

A NASA Technical Memorandum (TM) on BSI's [OSPREy](#) system is now available for download. The TM, titled [Optical Sensors for Planetary Radiant Energy \(OSPREy\): Calibration and Validation of Current and Next-Generation NASA Missions](#), NASA TM# 2012—215872, was written by both NASA and BSI personnel. It is the first of two TMs explaining what OSPREy is and how it works.
