

BIOSPHERICAL INSTRUMENTS

# Environmental Monitoring Solutions

Biospherical Instruments is a globally recognized leader in the manufacture and integration of environmental monitoring solutions for use in the harshest places on Earth.

## Our Products

### Microradiometers

Biospherical's flagship product miniaturizes sensing at higher dynamic range.

### Multichannel Arrays

Gather valuable data with our multispectral and hyperspectral sensor packages.

### UUV/USV

Our Unmanned Underwater and Surface vehicles are customized to your payload needs.

### Anti-Biofouling

Mitigate biofouling on in situ sensors with our patent pending modular solution.

## Why Choose Us?

Our sensor payloads and delivery systems get you the data you need to enhance the capability, productivity, and safety of your business.

- ✓ Customized Payloads
- ✓ Any Use Case
- ✓ State-of-the-Art
- ✓ Global Presence

## UUV/USV

BSI has a full line of autonomous and remotely operated vehicles for payload deployment.

C-PrOPS  
Multispectral UUV

HyOPS  
Hyperspectral UUV

EMILY  
Small USV

AMY  
Ruggedized USV

RECKLESS  
Large General Purpose USV

COMET 300  
Autonomous UUV

## Sensors

Unmatched in dynamic range, sensitivity, capability, and durability in harsh environments.

XRR  
Microradiometer Array

Q-Series  
PAR Sensors

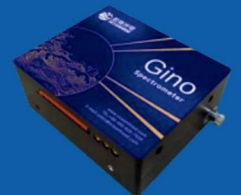

GUV  
Ground Station

Fluorimeters

NDIR Gas Sensors
